Stanzaming - timeline

A	B	C	D E F G H I J K L M N O P
1 Date/Time	Event	Link	
2 October 2015	The vulnerability CVE-2019-3568 was introduced into the VOIP codebase	Code commit	
3 Mid-2016	NSO may have become aware of this vulnerability	"We have reason to believe NSO has had this bug for 3 years." @Drew	
4 Early 2017	The initial code of init bwe (infoleak primitive) is introduced in the codebase	"If the exploitation we found is the one which was there for 3 years, we may have another info leak code other than bwe probing? The initial code of init bwe looks around early 2017." (c) Xi Deng	
5 09/03/2018 - 05:34 PDT	Internal security review finding of ability to inject voip_settings	T33535414	
6 9/6/2018	First evidence of possible voip manipulation and debugging (blocked by this point). The blocked traffic experiments with the connecting_tone_desc buffer by placing a dummy string there. In the Stanzaming incident this same buffer was used to carry the Bash script	suspicious_stanza_summary.xls (Otto provided)	
7 9/7/2018 13:12	Someone experimenting with a relaylatency client-side overflow (another vulnerability that we had found, server is blocking it by this point)	suspicious_stanza_summary.xls (Otto provided)	
8 10/04/2018 - 10:34 PDT	Began work to validate all call stanzas	T34775320	
9 11/16/2018	A whitehat researcher reported a vulnerability in chatd: group_update message can be used to inject voip_settings		
10 12/4/2018	Logging + blocking of group_update messages was implemented	t37576393	
11 12/5/2018 - 3:20 PDT (?)	Suspicious group_update message sent from client with a non-standard 'dontuploadfieldstat' element to a what looks like real users/possible victims. This activity would be more consistent with actual exploitation. Traffic contains the early_rtt_computation and init_bwe flags , so could be an earlier version of the same exploit that is now broken. Relay IP address in M247 Ltd Frankfurt, which is probably not ours?	suspicious_stanza_summary.xls (Otto provided) Original paste from Jesus: P60403946	
12 12/5/2018 - 10:37	Actor observed debugging manually why group_update messages no longer work (we've blocked them)	suspicious_stanza_summary.xls (Otto provided)	
13 12/10/2018 15:58	Actor observed again debugging manually why group_update messages no longer work (we've blocked them)	suspicious_stanza_summary.xls (Otto provided)	
14 12/12/2018 08:01	Actor trying to send (now blocked) group_update messages by varying client version. Non-standard 'dontuploadfield' element present again.	suspicious_stanza_summary.xls (Otto provided)	
15 12/05/2018 - 00:00 PDT	Resolved T33535414 by preventing group_update stanza from being accepted from the client	https://out.internmc.facebook.com/intern/di/ID13309896/?dest_number=65301787	
16 12/18/2018	Oldest registration timestamp for attacker devices found by manual sampling (registration metadata looks different so likely a test device)		
17 1/3/2019	Someone attempted to send group_update messages with the init_bwe and early_rtt_computation settings which we now know is related to this SEV. Blocked by server at this point. Possibly trying to make the exploit not go via our relay servers (relay server IP is in M247-LTD-Madrid netblock)?	P60548978	
18 1/19/2019	ShmooCon presentation by Lookout has the following quote from a nation state "This is the only inexpensive way to get to the iPhone, except for the [Israeli] solution for 7 million and that's only for WhatsApp. We still need Viber, Skype, Gmail, and so on."	https://blog.lookout.com/shmoocon-2019	
19 1/30/2019	Oldest registration timestamp of Samsung-VMWare device found by manual sampling		
20 February 2019	Ted Reed: "Back in Feb Nicolas Trippar told me he heard rumors of WA exploitation on Android, and thought it was related to UPNP/STUN in the VOIP stack." This is not an entirely correct description of the exploit but is pretty close as relays use STUN		
21 2/19/2019	Someone still trying to send group_update message with only an <aaa> tag in it	P60971021	

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P
22	3/13/2019	More experiments with relay/latency overflow (an unrelated client-side vulnerability, blocked by server and client-side patches)	P61694964, P61695207, P61695107												
23	mid-March 2019	Intel reports demonstration of 0-click Whatsapp 0day with post-exploitation capability (latest iPhone XS, latest iOS)	Community Threat Intel (t43510580)												
24	3/18/2019	First evidence of build stun_req crash, a side effect of an unreliable exploit, starting to spike	https://our.internmc.facebook.com/intern/px/p/xV0R/												
25	04/24/2019 - 00:00 PDT	Stanza validation begins to roll out (ODS counters are deployed for failures)	https://fburl.com/ods/0ebw6scy												
26	04/29/2019 - 17:38:30 PDT	First malicious stanza sent by Actor	https://phabricator.internmc.facebook.com/P64594386												
27	05/02/2019 - 16:45 PDT	Investigation starts: incident escalated to ProdSec, CERT/IR, Corp Threat Intel (Malware analysis)													
28	May 5, 2019 13:03:00 PDT	From the victim logs was found a link to RTCP packets sent via edgeray and the buffer overflow vulnerability, hypothesized root cause, is discovered, and a fix is put up for review	S180113 - even timeline												
29	May 6, 2019 18:00:00 PDT	Start of logging packets in edgeray to confirm the root cause and scope the exposure. The WhatsApp team and Security teams are coordinating daily	S180113 - even timeline												
30	May 6, 2019 20:00:00 PDT	Both server and client fixes were prepared upfront and ready to deploy, while investigation continues	S180113 - even timeline												
31	May 7, 2019 20:00:00 PDT	Edgeray logging moved to Scribe/Hive	S180113 - even timeline												
32	May 8, 2019 18:00:00 PDT	Validation for stanzas is pushed but behind a gate. More fixes for the client VoIP stack are out for review	S180113 - even timeline												
33	May 9, 2019 18:00:00 PDT	Chatd logging moving to Scuba, having ability to correlate the two sources of logs. Edgeray fix to drop large RTCP packets is pushed but behind a gate	S180113 - even timeline												
34	05/09/2019 - 22:08 PDT	We unsuccessfully attempted to fetch the payload from c2 nodes, possibly tipping off the attacker	"Realize its getting later here, but just wanted to update that my attempts to pull stage two failed" (c)												
35	2019-05-10 04:50:12	Edgeray packets containing strings with youtube links are sent, likely by attackers	Drew https://fb.workplace.com/chat/2454503014568922?mid=mid_%24gAAi4W4Rlk9mx0WloRVgnCQfmi3Zl												
36	May 10, 2019 14:45:00 PDT	Investigation group confirmed that all observed attacks relied on the same root cause	One edgeray cleartext packet contained... S178165 mitigation monitoring - Saturday/Sunday												
37	May 10, 2019 15:00:00 PDT	Remediation started: server fix in edgeray to drop large RTCP packets is enabled	S180113 - even timeline												
38	2019-05-10 17:00 PDT	Server fix in edgeray to drop large RTCP packets is deployed to 100%													
39	May 13, 2019 08:00:00 PDT	Over the weekend investigation group monitored the logs and confirmed the remediation was effective	S178165 mitigation monitoring - Saturday/Sunday												
40	May 13, 2019 09:00:00 PDT	Android and iPhone releases containing the fixes are prepared and on Monday morning they are available on app stores	S180113 - even timeline												
41	May 13, 2019 14:00:00 PDT	Second server fix to perform stanza validation is enabled	S180113 - even timeline												
42	May 13, 2019 15:20:00 PDT	CVE is made public	https://www.facebook.com/security/advisories/cve-2019-3568												
43	May 13, 2019 15:30:00 PDT	FT article describing the attack goes out	https://www.ft.com/content/4da1117e-756c-11e9-bc7d-6d846537acab

Andrey Labunets May 17, 2019 at 5:41 pm

I think what happened is that WA engineers brought devices to our forensics lab. I also don't think this is a thing to mention in the timeline, but I'll later look into that

Erik Waher May 17, 2019 at 5:38 pm

The exact times are important here - do we have them?

Erik Waher May 17, 2019 at 5:37 pm

This should be an absolute time cmd or cited as a reference cmd for examples of the log. Its unclear what it means right now in the context of the timeline

Erik Waher *May 17, 2019 at 5:36 pm*

Please reference what edgeray is and why its relevant to this timeline

Erik Waher *May 17, 2019 at 5:36 pm*

Can we cite the pattern observed?

Erik Waher *May 17, 2019 at 5:35 pm*

Please provide more context what this means

Erik Waher *May 17, 2019 at 5:35 pm*

Please provide more context what this means

Erik Waher *May 17, 2019 at 5:34 pm*

Added clarification here. Please confirm accurate statement.

Erik Waher *May 17, 2019 at 5:33 pm*

Superfluous to a timeline. Either its evidence, or its not. Suggest removing this line

Erik Waher *May 17, 2019 at 5:33 pm*

Andrey Labunets can you reconcile these two statements (YuanYuan & Otto)

Erik Waher *May 17, 2019 at 5:30 pm*

Since this is a WA log I assume its PDT and marked as so.

Erik Waher *May 17, 2019 at 5:28 pm*

No hard evidence we can cite here?

Erik Waher *May 17, 2019 at 5:26 pm*

Unclear: who produced this report (whatsapp or a report about whatsapp)

Erik Waher *May 17, 2019 at 5:23 pm*

Without hard evidence, I think we should say "NSO may have become aware of this vulnerability" instead of an absolute 'they are aware'
